European Society of Thoracic Surgeons at Council of Europe
Presents an educational event under the patronage of Mr Secretary General

TERRORISM & DISASTER MANAGEMENT

REACT THE RIGHT WAY

EVENT OVERVIEW

From the history of terror to the future of cyberterrorism we will discover the mind of a terrorist through the eyes of the experts. We will then delve into the various methods available to you to be best prepared for the worst case scenario from a medical standpoint. With talks from established professionals we will cover a whole host of topics, giving you a broad but detailed knowledge of terrorism and how to prepare yourself if the worst does happen.

EVENT OVERVIEW

Learn organisation and planning methods used by fellow professionals that enable effective use of available resources, while placing patients at the centre of your attention during large casualty disasters. From how to deal with large volume arrivals in hospitals to specific blast related injury care all the way to how we can learn from past events to better prepare ourselves, this programme is intended to give you a good insight into effective planning for the worst.
